WORK EXPERIENCE

Walmart Global Tech

Sep 2026 - Present

Software Engineer III

Bentonville, AR

- Lead frontend solution design for enterprise financial applications, using **Redux** and **React Context** to structure shared state while refactoring duplicated **React** components into reusable, testable, and maintainable modules.
- Build **React** and **Java** features end to end, translating product requirements into technical designs, backend services, and reliable financial workflows.
- Design and implement **MySQL** stored procedures on Azure Database to support server-side financial data processing and application integrations.
- Own production releases through LooperPro **CI/CD** pipelines, monitoring **Kubernetes** deployments, validating application health, and troubleshooting release failures.

Walmart Global Tech

Feb 2025 - Sep 2026

Software Engineer II

Bentonville, AR

- Developed key frontend features for enterprise financial applications using **React**, integrating with **Python**-based microservices deployed on **Kubernetes** while optimizing API requests and data rendering performance.
- Developed multiple core pivoting UI components for an Excel Add-in financial analytics application, orchestrating complex event-driven interactions to enable dynamic financial data workflows.
- Deployed, monitored, and troubleshoot containerized services on Kubernetes, diagnosing and resolving production incidents, performing root cause analysis, and improving system reliability.
- Automated testing workflows using Playwright, and maintained 80%+ test coverage using Jest and Pytest, ensuring code quality and reducing regression risk in LooperPro CI/CD pipelines.

Walmart Global Tech

Jun 2024 - Aug 2024

Software Engineer Intern

Bentonville, AR

- Improved **React** development speed by 20% and achieved 85% test coverage by promoting test-driven development with **Jest** and **Playwright**.
- Improved demand-scenario analysis efficiency by 50% while reducing server errors by 30%.

Travelers

Jun 2023 - Aug 2023

Technology Leadership Development Program

- Built **React** and **Java** features using test-driven development and Jenkins CI/CD, improving feature-change analysis efficiency by 25% for MergeMania.

MessageGears

Jan 2023 - May 2023

Software Engineer Intern

Atlanta, GA

- Developed **Java** backend services with server-side validation and **Mockito** tests, improving data integrity and regression protection.

EDUCATION

Georgia Institute of Technology

Aug 2022 - Dec 2024

Bachelor of Science in Computer Science, GPA 3.95

Atlanta, GA

TECHNICAL SKILLS

Languages: Python | Java | JavaScript | Typescript | SQL

Frontend: React | Redux | React Context | HTML | CSS

Backend & Cloud: Node.js | Express.js | REST APIs | Microservices | Docker | Kubernetes | AWS

Data & Tools: Git | Jira | Playwright | SonarQube | Jest | PyTest | MongoDB | MySQL
