WORK EXPERIENCE

Walmart Global Tech

Feb 2025 - Present

Software Engineer II

Bentonville, AR

- Designed and developed reusable frontend components (e.g., Driver Popup, Copy Scenario, Filter Chips) for the Unified Financial Model project with React.js and Redux to enhance maintainability across micro-frontends.
- Achieved and maintained 80%+ code coverage across critical modules using Jest and Playwright, and enforced quality standards through SonarQube, catching regressions early in CI/CD pipelines (LooperPro).
- Led integration of autocomplete and fuzzy search functionalities into complex data trees, improving search speed and accuracy for financial analysts.
- Served as On-Call Primary, diagnosing and resolving P1–P4 production incidents across Kubernetes microservices, producing detailed RCAs and coordinating with teams to ensure system resilience.

Walmart Global Tech

Jun 2024 - Aug 2024

Software Engineer Intern

Bentonville, AR

- Increased React.js development speed by 20% and achieved 85% test coverage through championing Test-Driven Development with Jest and Playwright and using CI-CD tool Looper for the in-house tool Demand Workspace.
- Improved feature change analysis by implementing critical demand scenarios and manual adjustments, enhancing user efficiency in data management by 50% and reducing server error by 30%.
- Contributed to project success by completing 15 assigned tickets and testing 12 items, achieving 26 story points ahead of schedule.

Travelers

Jun 2023 - Aug 2023

Technology Leadership Development Program

Hartford, CT

- Championed Test-Driven Development and CI-CD tool Jenkins to develop MergeMania with React.js and Java, enhancing feature change analysis efficiency by 25%.
- Increased user interface satisfaction by 40% through implementing critical features, using user feedback and iterative testing.
- Achieved seamless integration and reduced development time by 30% by establishing 100% mock backend endpoints.

PROJECTS

LMC Film Equipment Rental Web App

Jan 2024 – Dec 2024

Team Lead & Full-Stack Developer

Georgia Tech

- Led a team of 6 as Software Engineer Lead and Manager in delivering a full-stack web application for the Georgia Tech School of Literature, Media, and Communication (LMC) students and faculty.
- Directed end-to-end project lifecycle including architecture decisions and Jira task delegation.
- Designed and implemented key features including PayPal payment integration, equipment reservation management, and responsive UI with React and Redux, improving department operations.

EDUCATION

Georgia Institute of Technology

Aug 2022 - Dec 2024

Bachelor of Science in Computer Science, GPA 3.95

Atlanta, GA

TECHNICAL SKILLS

Languages: Java | Python | C# | JavaScript | Typescript | HTML5 | CSS3 | Go | Ruby

Frameworks & Libraries: React | Express.js | Bootstrap | Tailwind CSS | Vue.js | Django | jQuery | Unity 3D

Technologies: Jira | AWS (S3) | VS Code | Git | Postman | Azure | Unity | Jupyter | Firestore | Docker | Kubernetes | Github Actions | MongoDB | MySQL | Jest | SonarQube | Playwright | Netlify | Heroku
